Career Goals and Objectives

Aspiring software developer seeking to leverage my expertise in full-stack development and problem-solving skills to contribute to impactful and innovative projects in the tech industry.

Education

Techno India NJR Institute of Technology, Udaipur, Rajasthan, India
Bachelor of Technology, Computer Science & Engineering
CGPA: 8.3/10.00

May 2021 - May 2025

Experience

Informatica, IT Apps and Analytics Intern (Bangalore, Karnataka)

October 2024 -July 2025

- Improved content management workflows and backend processes by developing and optimizing components using Java and other technologies, making content updates faster and easier for teams.
- Built and enhanced ReactJS components, reducing UI load times by 25% and increasing page responsiveness and user engagement across key customer journeys.
- Diagnosed and fixed multiple frontend and backend production bugs, reducing system downtime and improving customer satisfaction.
- Designed and delivered key product features, including an AEM-based author bio module and a React-powered Target & Analytics dashboard, enabling seamless access to real-time marketing insights for business users.
- Developed a secure login functionality for the company's main website using Okta authentication, ensuring safe and reliable user access.
- Worked with IT, analytics, and engineering teams to enhance business applications and streamline workflows.
- Designed and implemented a Redis-based Proof of Concept for time zone-aware applications, reducing scheduling discrepancies and laying groundwork for global-scale use cases.

Skills

Languages: Java (Core & Advanced), Python, JavaScript, TypeScript, HTML

Frontend: ReactJS, Redux

Backend: Spring, Spring Boot, Spring Microservices, NodeJS, ExpressJS

Databases: SQL, Redis, MongoDB

DevOps/CI/CD Tools: Jenkins, Docker, GitHub Actions

Web Technologies: MERN Stack (MongoDB, Express.js, React, Node.js), Java Full Stack, AEM (Adobe Experience Manager)

Projects (Available on Github)

DocuSimilar

- Developed an advanced document similarity analysis platform using the MERN stack with cutting-edge AI technologies, implemented multiple semantic similarity algorithms including Retrieval-Augmented Generation (RAG) using FAISS vector databases and LangChain frameworks, integrated both cloud-based AI services (OpenAI GPT-3.5, Hugging Face Transformers, Amazon Bedrock) and local AI models using transformers.js for cost-effective processing, created an intuitive React frontend with real-time document comparison and algorithm selection, implemented comprehensive text preprocessing with chunking and embedding generation, and utilized advanced vector similarity search techniques for accurate semantic analysis across multiple document formats.

Smart Email Assistant

- Built an AI-powered email assistant using Spring AI, React, and a Chrome extension, enabling smart email drafting, context-aware reply suggestions, and intelligent prioritization of incoming emails. Integrated OpenAI APIs for natural language processing, implemented server-side email classification and summarization, and created a seamless browser extension interface for instant inbox assistance.

MelodyStream

- Developed a full-stack music streaming platform using the MERN stack, implemented user authentication, personalized playlists and music playback features, created an admin panel for content management and album management, used Cloudinary for media storage

Book Application

- Developed a robust backend system for a book application using Spring Boot, implemented database operations and RESTful API endpoints, and utilized Thymeleaf for server-side HTML templating.

ParkWise

- Developed a comprehensive parking management application with real-time slot booking functionality, integrated interactive maps using Leaflet.js for navigation and location services, implemented secure payment processing with Razorpay, created separate user and admin interfaces with role-based access control, and utilized face recognition and image compression for vehicle verification.
